

ZIYUE (ZOEY) LING

(878) 787-0139 | ziyuelin@andrew.cmu.edu | Pittsburgh, PA

PROFESSIONAL SUMMARY

Information Systems and Artificial Intelligence student with experience in hardware-software deployments, youth engagement, community outreach, event coordination, user-centered product design, and data-informed research. Interested in translating HCI research into accessible educational products and partnerships.

EDUCATION

Carnegie Mellon University

B.S. Information Systems; Additional Major in Artificial Intelligence | GPA: 3.65/4.0

Pittsburgh, PA

Expected May 2028

Relevant Coursework: Designing Human-Centered Software; Interaction Design Fundamentals; Database Design and Development; Probability Theory for Computer Scientists

RELEVANT EXPERIENCE

Mellon College of Science, Carnegie Mellon University

Pittsburgh, PA

Linux Programmer

Sep 2025 - Present

- Support deployment of datacenter sensors, integrating hardware and software components and building hands-on product installation experience.
- Develop web applications and backend data infrastructure with HTML, CSS, JavaScript, Python, and SQL in collaboration with the Director of Scientific Computing.
- Conduct website security audits to identify vulnerabilities and support secure data handling.

Carnegie Mellon University Pre-College Program

Pittsburgh, PA

Resident Assistant

Jun 2025 - Aug 2025

- Supported a community of high school students throughout a six-week residential program, helping ensure safety, well-being, and a successful transition to campus life.
- Led floor meetings and community-building events; communicated with students and professional staff to resolve concerns and foster an inclusive environment.

IS Sphere

Carnegie Mellon University

Women in IS Mentor

May 2025 - Present

- Help organize university-wide Information Systems events that strengthen outreach and community engagement.
- Facilitate networking activities, including student coffee chats with professors and opportunities to connect with Information Systems advisors.

PRODUCT, DESIGN & RESEARCH

ProdHacks

Team Member

Feb 2025

- Analyzed rider and driver journeys and proposed Uber mobile-app improvements focused on trip-time accuracy and transparency in driver performance metrics.
- Designed Figma prototypes for rider and driver experiences, simplifying navigation and addressing friction points identified through user-journey analysis.

Lake Pollution and Policies in China

Research Paper

Jun 2022 - Aug 2022

- Analyzed environmental datasets and synthesized peer-reviewed literature to identify factors contributing to water-quality degradation under the guidance of Dr. Catherine Cardelus, Colgate University.

Minesweeper Kings' Tour

Term Project (15-112)

Dec 2024

- Built a two-player strategy game and implemented Python-based AI decision models across multiple difficulty levels.

SKILLS

Business & Product: Community outreach, event coordination, stakeholder communication, youth engagement, user-journey analysis, product deployment

Design & Data: Figma, Canva, SQL, Python, RStudio, database design, qualitative and quantitative research

Technical: HTML, CSS, JavaScript, C, GitHub

Languages: English (fluent), Chinese (fluent), French (intermediate)
